

Please reject the NAB's petition 04-160. Nobody else provides a service that is as good as satellite radio. As I travel it is great to be able to listen to the programming I want without interruption. The traffic and weather reports alone are worth the price of the service. On broadcast radio you have to wait until the station feels it's time for you to hear a traffic report or the weather. On XM YOU got it when YOU WANT IT.
